

Mobile Classroom

The wind and solar powered Renewable Energy Mobile Classroom boasts hands-on learning stations in solar, wind energy, and other renewable resources as well as models that demonstrate hydropower, energy efficiency, and more. We deliver this state standard aligned, authentic teaching opportunity right to your door!

Science Camps are offered to students K-12. Renewable energy, water quality and watersheds, ecosystems, environmental stewardship, and resource conservation are some of the many options available. Don't see what you are looking for? We will design a custom program just for you!
